COVID 19:

We pride ourselves on the cleanliness of our properties. However with the current Coronavirus situation our preparations for your stay have been even more stringent.

Unfortunately this has meant the removal of some of the soft furnishing, cushions and throws etc, books & magazines, silk flower arrangements and any unnecessary items around the house in order for effective disinfection of the house.

The house has been thoroughly cleaned and then disinfected. There is a check list available to view in the kitchen. The house has then been dry fogged with a fogging machine containing Anti viral rated disinfectant.

We ask that all visitors use the hand sanitizer at the entrance to the house before entering. Inside the house under the kitchen sink is a cleaning kit to enable you to sanitise areas in the house during your stay.

If at any time during your stay any of your group feels unwell with COVID 19 symptoms we ask that you inform Estate staff via the emergency numbers on your arrival letter. You should then return home immediately to seek medical attention and self isolate for 14 days.

After your stay, before you leave we ask that you open a window in all the rooms were possible, to allow for air circulation before our cleaning team come in. Please return the key to the key safe, ensure you have locked the doors.

Thank you.
